INFORMATION DISCLOSURE STATEMENT

Sir:

In accordance with their obligation under 37 C.F.R. §1.56, Applicants would like to call the Examiner's attention to the document listed on the attached form SB-08B.

Applicants note that this document was cited in the International Search Report as "Chusei Template o Michiita Ko Hyomenseki Microporous Sanka Niobium no Gosei oyobi Characterization" and is an abstract of a presentation made by the inventors and applicants herein at the 88th Catalytic Forum of Catalytic Society on October 12, 2001. The original document

is in Japanese and an English language translation is attached

Applicants respectfully note that the abstract was prepared for the conference on September 20, 2001, but was not actually distributed to the public until the beginning of the conference on October 9, 2001, and was, therefore, not a "printed publication" until the later date. The test for whether or not a reference is a "printed publication" under 35 USC §102(b) is the public's access to the reference. Thus, a reference is a "printed publication" if the document was disseminated or otherwise made available to the extent that persons interested and ordinarily skilled in the subject matter or art, exercising reasonable diligence, could locate the document. *In re Wyer*, 210 U.S.P.Q. 790 (CCPA 1981).

Accompanying the document and its English translation is statement and English language translation attested to by Koichi Segawa, Chairman of the Catalytic Society, and bearing his seal, confirming that the subject abstract was not publicly distributed until the beginning of the conference on October 9, 2001, (Exhibit A). Also accompanying the document are copies of the first page of the list of papers showing the dates and location of the conference, with an English language translation of that information, (Exhibit B), and the conference schedule for October 12, 2001, showing the session at which the presentation was made, with an English language translation thereof, (Exhibit C).

Inasmuch as the international filing date of PCT/JP02/10282, of which the present application is the U.S. national stage, was October 2, 2002, less than one year after the dissemination date of the abstract, Applicants respectfully submit that the abstract is not a "printed publication" citable in the present application under 35 USC §102(b).

In addition, Applicants note that the abstract lists, as authors in addition to the inventors herein, Ru Dairin and Michikazu Hara. Applicants Domen, Nomura and Ri respectfully point out that authors Ru and Hara were research workers at the Tokyo Institute of Technology working under the direction and supervision of the inventors, Domen, Nomura and Ri, and are therefore not considered co-inventors of the subject matter described in accordance with *In re Katz*, 215 U.S.P.Q. 14 (CCPA 1982). In support thereof, Applicants herewith submit their Declaration under 37 CFR §1.132, accompanied by an Affidavit of the Inventors in Japanese, with an English language translation, (Exhibit D), and an affidavit of the collaborators, Ru and Hara, in Japanese with an English language translation, (Exhibit E).

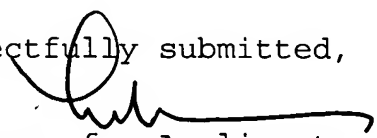

In view of the foregoing, Applicants respectfully submit that the document listed on the attached form SB-08B and cited in the International Search Report is not citable as a reference in the subject application.
